PROFILE

I am a new engineer intent on gaining experience, immersing myself in my career, building new projects, and nurturing my love of software engineering.

SKILLS

HTML, CSS, Sass, JavaScript, TypeScript, React, Document Object Model (DOM), Web APIs, RESTful APIs, Node.js, Express.js, Next.js, MySQL, Knex.js, Pair Programming, Agile, Jira, Miro, Confluence, Scrum, Git, Git Flow, GitHub, User Authentication, OAuth, Vitest, Jest, Netlify, Heroku, Firebase, Figma

PROJECTS

Lead Coder | [Portfolio](#)

FEB 2025, PROFESSIONAL PORTFOLIO

- Used React and Sass to build front-end, Node.js, Express.js, MySQL, and Knex.js to build back-end, including database, server-side software, and API.
- Used Git and GitHub for version control and Netlify and Heroku to deploy.

Lead Coder | Mindful Moments

OCT 2024, BRAINSTATION & BELL CANADA INDUSTRY PROJECT

- Used React, Node, Express, and Pair Programming to build an innovative app in a team, based on the challenge posed by judges from Bell Canada: to raise awareness and engagement with Bell's Let's Talk initiative.
